
300 mg/day

Ovoderm®

THE ONLY **VEGETARIAN COLLAGEN**

Clinically proven to fight the main
signs of skin aging

As skin ages, the natural production of collagen, elastin and hyaluronic acid is reduced, leading to less firm and drier skin.

Ovoderm® has been clinically proven to boost the production of those essential building blocks of the skin, contributing to recover skin softness, smoothness, moisture and firmness.

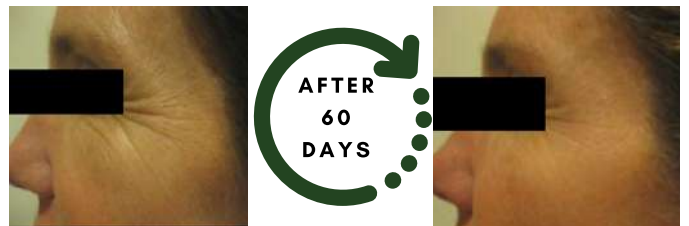

Ovoderm®

BY EGGNOVO

SMOOTHS OUT WRINKLES

Ovoderm® activates your body's natural **collagen and elastin production**, key structural proteins that fill your skin, leading to reduction in the appearance of wrinkles and fine lines.

BOOSTS SKIN HYDRATION

Ovoderm® restores skin barrier function reducing transepidermal water loss, and stimulates hyaluronic acid synthesis, a molecule naturally found in our skin that holds skin moisture and helps keep it hydrated and glowing.

9/10

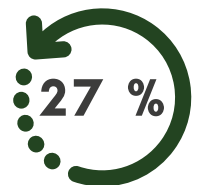

SKIN HYDRATION IMPROVEMENT

FIRMS UP SAGGY SKIN

Ovoderm® increases skin elasticity and firmness helping to reverse age-induced skin laxity.

Skin fatigue reduction
vs. placebo

Ovoderm®

BY EGGNOVO

PROVIDES ANTIOXIDANT PROTECTION

Ovoderm® protects skin from oxidative stress that breaks down collagen and hinders skin's natural repair process. Due to its high **antioxidant activity**, Ovoderm® helps prevent visible damage produced by free radicals.

REDUCES AGE SPOTS

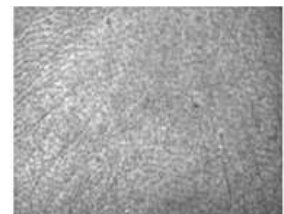

As we age, our melanocytes (pigment cells) multiply more quickly and can cluster together to form age spots. Ovoderm® helps reduce hyperpigmentation and the appearance of age spots providing a **uniform skin tone**.

DECREASES ROUGH SKIN TEXTURE

Rough skin is often caused by dryness and a build-up of dead skin cells. Due to its ability to stimulate skin cell renewal and increase skin hydration, Ovoderm® helps recover skin smoothness and softness.
